ANNUAL REPORT OF MINING OPERATIONS

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1953, as amended, and the General Rules as promulgated under the Utah Minerals Regulatory Program. An operator conducting mining operations under a Notice of Intention must file an annual operations and progress report (FORM MR-AR) with the Division.

I. General Information

1. Report Time Period: From (mo./yr.) 1/99 To (mo./yr.) 1/2000
 2. DOGM File Number (Mine No): 50 103C1017
 3. Mine Name: GREEN BEETLE
 4. Mineral(s) Mined (or permitted to mine): MICACEOUS QUARTZITE SCHIST
 5. Type of mine ☒ Surface Mine or ☐ Underground Mine
 6. Legal Description (Location of Lands Affected):
1/4, 1/4, SE 1/4, Section 36, Township 11N, Range 16W
1/4, 1/4, 1/4, Section , Township , Range
1/4, 1/4, 1/4, Section , Township , Range
 7. Name of Operator or Company: UTAH BUILDING STONE SUPPLY
 8. Permanent Street Address: 842 WEST 400 NORTH
City, State, Zip: WEST BOUNTIFUL, UTAH 84087
Phone: 801-295-0601 Fax: 801-295-0601
 9. Company Representative (or designated operator):
Name: WILLIAM BOWN
Title: OWNER
Business Address: SAME AS #8
City, State, Zip: _____
Phone: _____ Fax: _____
- ☐ Please check if any of the above information has changed since previous year.

II. Mining and Reclamation

1. Was there any mine related activity during the past year? Yes ☒ No ☐
2. If no - what was the last year of activity? _____
3. If yes - how much ore or mineral was mined? 408.14 TONS PALLETIZED

4. Briefly describe the type of work performed, volume of material moved, and any new or additional surface disturbances that occurred during the past year.

5. How much **additional acreage** was disturbed during the past year? _____

6. How much acreage was **reclaimed** during the past year? _____

7. Briefly describe the reclamation work performed during the past year. This description should include methods employed, and an evaluation of the results.

8. What is the **total** disturbed acreage of entire project at years end? _____

9. Briefly summarize any mining and/or reclamation plans for the upcoming year.

NOTE: Section III., "Additional Information" applies only to **large mining operations**.

III. Additional Information

1. An updated surface facilities map should be attached if there have been significant changes since the previous map was submitted.
2. Any monitoring results or other reports that are required under the terms of the approved notice of intention should also be attached.

IV. Signature Requirement

I hereby certify that the foregoing is true and correct.

Name (Typed or Print):

WILLIAM L BOWN

Title of Operator:

OWNER

Signature of Operator:

William L Bown

Date:

Utah Building Stone Supply

Annual Mine Report

Green Beetle

Item # 4

Work performed included continued digging into the material deposit and retrieval of stone material by means of a track excavator, hauling the material away from the deposit for processing, and hauling from quarry to mill-site at Park Valley. The Upper Quarry seems devoid of adequate material for processing. There seems to have been some natural process that cemented the mica clefts rendering them most difficult to split. In other portions of this immediate area, the material has been so fractured as to render it quite useless for purposes of flagstone production. The one good vein within this area is so deep at this point, and it's quality so unreliable, that it is probably not wise to invest in any further pursuit. The bulk of activity took place in the lower quarry where the material is much more retrievable. It is estimated that the total material moved within the area was 1,000 tons. Of this some 500 tons were removed for processing. The total production was 408.14 tons.

Item #5

There was no additional acreage disturbed during the past year. There was a certain portion of previously disturbed ground which was briefly utilized as a processing area, and there was also a work camp briefly set up at the site. The BLM toured the area in the late spring and issued the operator a citation for trespass incident to the construction of a new road, and forbade the operator any further use of the public surface in the area, until further notice. Permission to again access the area has been granted the operator upon conditions. Most crucial of which is reclamation in an amount sufficient to offset the amount of disturbance required to travel across BLM ground to the Nielson lease area.

Item #6,7

There was no acreage reclaimed during the past year.

Item #8

Total disturbed acreage at years end is approximately 4.5. The operator is no longer liable for the road accessing the Nielson lease upon payment of the fine.

Item #9

Plans for this year include reclamation of a certain portion of the upper quarry sufficient to offset the amount of disturbance incident to the Nielson lease access route. The operator will likely lose lease rights to this area from USITLA in Sept. of this year.
